

“Quantifying Slum Electrification in India and Explaining
Local Variation”

Supplementary Appendix

Michaël Aklin	Patrick Bayer	S.P. Harish	Johannes Urpelainen
University of Pittsburgh	Washington University	NYU	Columbia University

January 1, 2015

A1 Content

This appendix contains the following material.

- Table A1 contains the summary statistics (including the variables used in the appendix).
- Table A2 controls for income.
- Table A3: the dependent variable is the possession of assets that require electricity.
- Table A4 explores variation among slums.
- Table A5 uses an alternative index of wealth (that excludes cell phones and grinders).
- Table A6 uses an alternative weighting system (to increase the weight of people living in slums).

A2 Summary Statistics

Summary statistics

	mean	sd	min	max	count
Rural					
Electricity	0.69	0.46	0	1	26759
